

WHITE LUBE OIL

CHAMPION WHITE LUBE OIL food-grade lubricant

For use in a variety of applications where a USDA H2 is required. It is a white mineral base oil providing rust and oxidation inhibition and offers excellent anti-wear protection. It is recommended for hydraulic systems and gear systems requiring food-grade oils. It is also a reduced environmental impact lubricant and inherently biodegradable by OECD 203 1-12 Test Method. It performed well in both aqueous acute toxicity tests and "ultimate" biodegradability tests.

CHAMPION WHITE LUBE OIL meets the requirements (discontinued in 1998) of the U.S. Department of Agriculture (USDA) for use in federally inspected meat and poultry plants as H2 lubricants with no food contact.

TYPICAL SPECIFICATION

ISO Grade	22
Product Code	4243
MSDS #	600
Color	None
Gravity API @ 60° F	33.9
cSt @ 40°C	20.5
cSt @ 100°C	4.1
SUS @ 104°F	100
SUS @ 212°F	40
Viscosity Index	98
Pour Point ° F	0
Flash Point ° F	400
% Biodegradability in 28 days OECD 301B	22
96-Hour Toxicity, Aquatic, OECD 203 1-12 LC50 (Rainbow Trout), ppm	Nontoxic
