SAFETY DATA SHEET

1. Product Identification

Champion Brands, LLC
1001 Golden Drive
Clinton, MO 64735
(660) 885-8151

Product line: CHAMPION® 600 Series Racing Brake Fluid
Products: 4059
CAS: Not applicable (Mixture)
Synonyms: Glycol-Based Brake Fluid
Recommended use: Disk and drum hydraulic brake fluid
Restrictions: Do not use where DOT5 is specified
Created: 26 April 2012
Revised: 25 November 2019
Emergency phone: CHEMTREC: (+1) 800-424-9300

2. Hazards Identification

Appearance: Clear to amber
Odor: Mild odor
Classification(s): Eye Irritation, Category 2A
Reproductive toxicity, Category 2
Target organs: None specified
Symbol(s):

Signal Word: Warning
Hazard Statement(s): Causes serious eye irritation. Suspected of damaging fertility or the unborn child.
Other hazard(s): Combustible liquid. Repeated exposure may cause dryness of the skin. Vapors may cause respiratory irritation.
Precaution(s): Wear eye and skin protection before handling. Do not breathe mist/vapors/spray. Wear protective gloves/protective clothing. IF IN EYES: Flush with water for 15 minutes and consult a physician. IF exposed or concerned: Get medical
advice/attention. If eye irritation persists: Seek medical advice/attention.

Disposal:
Keep out of waterways. Check local, national, and international regulations for proper disposal.

HMIS (estimated): Health - 2  Fire - 1  Instability - 0

3. Composition/Information on Ingredients

<table>
<thead>
<tr>

</table>

4. First Aid Measures

Eyes
Remove contact lenses, if worn. Rinse with running water for at least 15 minutes, lifting upper and lower eyelids occasionally. Seek medical attention.

Skin
Remove affected clothing and launder before reuse. Wash affected area for at least 15 minutes with soap and running water. Prolonged or repeated exposure may cause defatting of the skin - symptoms include redness, dryness, cracking.

Inhalation
Remove exposed person to fresh air immediately. Restore or assist breathing, if necessary. Get medical attention immediately if symptoms of CNS depression or intoxication develop.

Ingestion
Do NOT induce vomiting. If conscious, give two full glasses of water. If a significant volume has been swallowed, get medical attention immediately.

Additional Info
Not determined

Specific Treatments
Not determined. Treat symptomatically

5. Fire Fighting Measures

NFPA (estimated): Health - 1  Fire - 1  Instability - 0
Flash Point:  >121°C / 249°F (calculated)

Extinguishing Media:  For small fires use alcohol foam, dry chemical or CO₂. For large fires apply large (flooding) quantities of water from as far away as possible in a spray or mist.

Unsuitable Media:  Water jet may be ineffective

Firefighting Procedures:  Wear a self-container breathing apparatus if necessary based on concentrations of smoke. Material will produce primarily oxides of carbon as combustion products.

Unusual Hazards:  Not Determined

6. Accidental Release Measures

Personal precautions, protective equipment, and emergency procedures:  Ventilate if released in a confined area. Avoid breathing mists/vapors/spray. Product may present slipping hazard if left on the floor. Beware of vapors pooling in low areas to explosive concentrations.

Environmental precautions:  Avoid release to the environment. Prevent from entering into soil, ditches, sewers, waterways or groundwater

Methods for removal:  Use pump to remove bulk liquid. Residual liquid can be absorbed on inert material. Dispose of contaminated adsorbent as hazardous waste. Wash the area with water after excess product and adsorbent is removed.

7. Handling and Storage

Max. Handling Temp:  Not determined

Procedures:  Use in a well ventilated area. Avoid breathing mists/vapors/spray. Avoid handling hot product where possible. Use appropriate personal protective equipment to avoid contact with skin and eyes. Note the location of nearest emergency shower and eye wash station before use. Store with the lid tightly closed in a cool, dry, well-ventilated place. Product is hygroscopic and effectiveness may diminish if opened product is stored for long periods of time. Dispose of spilled or used material in accordance with local, regional, national, and international regulations.
Max Store Temp: Do not store or handle at elevated temperatures.

8. Exposure Controls/Personal Protection

Exposure Limits

US Guidelines by component
Monoethanolamine (CAS # 141-43-5)
ACGIH TWA: 3 ppm
ACGIH STEL: 6 ppm
OSHA TWA: 3 ppm
OSHA STEL: 6 ppm
NIOSH TWA: 3 ppm
NIOSH STEL: 6 ppm

Other Exposure Limits: Not determined

Engineering Controls: Use in a well ventilated area. Local and general ventilation should keep methanol vapor concentration below permissible limits. Where exposure potential exceeds recommended limits, use a NIOSH/OSHA approved supplied air respirator as recommended. Vapors are heavier than air and will tend to accumulate in low-lying areas.

Personal Protective Equipment
Respiratory: Use a NIOSH or CEN approved full-face respirator with multipurpose combination or type ABEK respirator cartridges as a backup to engineering controls. If the respirator is the only means of protection, use a full-face supplied air respirator

Eye: Use tightly-fitting chemical splash goggles. Use face shield, especially where splashing is likely to occur

Gloves: Use nitrile, butyl, viton, or fluoroelastemer gloves. Even appropriate materials may degrade after prolonged exposure with product.

Clothing: Use chemical resistant pants and jackets, preferably of butyl or nitrile rubber

Other: Locate the nearest eyewash station and safety shower before handling this product. Limit exposure whenever possible.

Hygiene: Wash thoroughly after handling this product.
### 9. Physical and Chemical Properties

### 10. Stability and Reactivity

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stability</td>
<td>Material is normally stable at ambient temperatures and pressures.</td>
</tr>
<tr>
<td>Decomposition Temp</td>
<td>Not determined</td>
</tr>
<tr>
<td>Incompatibility</td>
<td>Keep away from strong oxidizers and strong acids/bases. Keep away from strong reducing agents such as powdered active metals</td>
</tr>
<tr>
<td>Polymerization</td>
<td>Will not occur</td>
</tr>
<tr>
<td>Thermal Decomposition</td>
<td>Primarily oxidizes to carbon dioxide in normal combustion conditions. In lower oxygen environments carbon monoxide, formaldehyde, or formic acid may be formed.</td>
</tr>
<tr>
<td>Conditions to Avoid</td>
<td>Vapors may catch fire – keep away from strong oxidizers, acids, bases as well as heat/sparks/open flames/hot surfaces</td>
</tr>
</tbody>
</table>

### 11. Toxicological Information

#### - Acute Exposure -

**Eye Irritation**

Expected to cause mild to moderate irritation of the eye if exposed to liquid or in high vapor concentrations. May cause irritation, tearing, or burning of the eyes.
Skin Irritation  
Expected to be mildly irritating to the skin. Symptoms of irritation may include redness, drying, and cracking of the skin.

Respiratory Irritation  
High vapor concentrations may cause transient irritation to the respiratory system.

Dermal Toxicity  
This product can be absorbed through the skin, but is of low order of toxicity. Limit exposure to skin where possible.

Inhalation Toxicity  
Toxicity is similar to that for oral ingestion, though this exposure mode is far less likely to occur.

Oral Toxicity  
Low order of toxicity, not expected to cause injury under normal exposure conditions. If a large amount of material is swallowed, target organ effects and metabolic acidosis may occur.

Aspiration Hazard  
This product has a very low viscosity and may be fatal if aspirated into the airways. Do NOT induce vomiting, as this increases risk of aspiration.

- Chronic Exposure -

Chronic Toxicity  
This product may cause dryness or defatting of the skin, dermatitis, or may aggravate existing skin conditions.

Carcinogenicity  
This product and its components are NOT listed by the IARC, NTP, ACGIH, or OSHA as carcinogens.

Mutagenicity  
Available information does not suggest that this product is a germ cell mutagen.

Reproductive Toxicity  
Available information does not suggest that this product is a reproductive toxin.

Teratogenicity  
Diethylene glycol has produced birth defects in rats at concentrations that are toxic to the mother.

- Additional Information -

Target organ toxicity  
Product is toxic to organs: Kidneys, liver, central nervous system, heart. Metabolic products of diethylene glycol produce acidosis and organ toxicity effects. In some cases, other metabolic abnormalities have been reported such as hyponatremia and hyperkalemia leading to nerve and cardiac damage.

Synergistic effects  
Though specific data is not available, ethanol is a competing substrate for NAD-dependent alcohol dehydrogenase and may slow the product of harmful metabolic products of diethylene glycol.

Pharmacokinetics  
No data available

12. Ecological Information

- Environmental Toxicity -

Freshwater Fish  
Acute LD50 > 590 mg/L (96h)

Freshwater Invertebrates  
Acute LD50 > 10g/l (48h)
Algae Not determined
Saltwater Fish Not determined
Saltwater Invertebrates Not determined
Bacteria Not determined
Miscellaneous Not determined

- Environmental Fate -

Biodegradation No data available. Expected to biodegrade rapidly and degrade by photo-oxidative reactions with the air
Bioaccumulation Product is very mobile in soil and water and is somewhat volatile – it is not expected to bioaccumulate.
Soil Mobility Product has high mobility in soil, slowly evaporates at environmentally relevant temperatures
Other Effects Not determined

13. Disposal Considerations

Disposal Considerations
All disposal practices must be in accordance with local, regional, national, and international regulations. Store material for disposal as indicated in Section 7. Disposal by controlled incineration or by secure land fill may be acceptable – review applicable regulations or regulatory bodies before making disposal decisions.

Contaminated Containers or Packaging
Empty containers are likely to contain flammable vapors or explosive mixtures of vapor and air. Do NOT weld, cut, or grind empty containers. Rinse empty containers with water and dispose of in accordance with local, regional, national, and international regulations

14. Transportation Information

Description shown may not apply to all shipping situations. Consult applicable shipping codes to determine any additional shipping requirements

US DOT
UN No 1993
UN Proper Name Combustible liquid, n.o.s. (Brake fluid)
UN Class CBL
Packing Group III
Marine Pollutant No

IMDG Not dangerous goods
ICAO/IATA Not dangerous goods
15. Regulatory Information

- Global Chemical Inventories/Regulations -
  USA
  All components of this material are on the US TSCA
  Other TSCA Reg.
  None known
  EU
  Components of this product and similar mixtures are
  registered under REACH. Consult the European Chemicals
  Agency regarding REACH registration, reporting, and other
  legal requirements for methanol solutions before importing to
  the EU.
  New Zealand
  May require notification before sale under New Zealand
  Regulations
  Canada
  All components of this product are listed on the Canadian
  Domestic Substances List (DSL).
  Canada WHMIS
  B3

- Other U.S. Federal Regulations -
  No components listed as Extremely Hazardous Substances
  list. See 40 CFR 355
  SARA Sect. 313
  No components of this product are subject to reporting under
  SARA Title III, Section 313. See 40 CFR 372

  SARA 311/312 Class
  Acute Hazard - YES
  Chronic Hazard - YES
  Fire Hazard - YES
  Reactivity Hazard - NO

  CERCLA Haz. Sub.
  No components listed. See 40 CFR 302

- State Regulations -
  CA Prop 65
  WARNING: This product contains diethanolamine known to
  the State of California to cause cancer and, ethylene glycol
  monomethyl ether, which is known to the State of California
  to cause birth defects or other reproductive harm
