SAFETY DATA SHEET

1. Product Identification

Champion Brands, LLC
1001 Golden Drive
Clinton, MO 64093
(660) 885-8151

Product line: CHAMPION ® Micro Sprint Oil
Products: 4445, 4446
CAS: Not applicable (Mixture)
Synonyms: Racing engine oil
Recommended use: Specialty engines
Restrictions: None determined
Created: 8 October 2012
Revised: 27 November 2019
Emergency phone: CHEMTREC: (+1) 800-424-9300

2. Hazards Identification

Appearance: Blue liquid
Odor: Mild Petroleum
Classification: None
Target organs: Not Determined
Symbol(s): None
Signal Word: None
Hazard Statement(s): None
Other hazard(s): Product will burn, though difficult to ignite. This product produces oil sheen on bodies of water. Components of this product are classified as toxic to aquatic life. Mists of sprays of this product may be harmful if inhaled. Used crankcase oil may contain carcinogenic combustion by-products.

Precaution(s): Wear protective gloves/protective clothing/eye protection. Contaminated work clothing should not be allowed out of the workplace. Avoid release to the environment.

Disposal: Keep out of waterways. Check local, national, and international regulations for proper disposal.
3. Composition/Information on Ingredients

Hazardous Ingredients:

<table>

</tbody>
</table>

4. First Aid Measures

Eyes
Flush eyes with running water for at least 15 minutes. Get medical immediately.

Skin
Flush exposed area with running water for at least 15 minutes. Remove contaminated clothing and launder before reuse. Get medical attention if irritation persists or if signs of an allergic reaction appear.

Inhalation
Move to fresh air. If nausea or other symptoms persist, get medical attention.

Ingestion
DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, lower head below hips to reduce risk of aspiration. If conscious, give one glass of water. Get immediate medical attention.

Additional Info
Note to physician: Treat symptomatically. Contact poison control for more information.

5. Fire Fighting Measures

Flash Point
> 180°C / 356°F (based on flammability of components)

NFPA
Health: 1  Fire: 1  Reactivity: 0

Extinguishing Media
Use water spray, fog, foam, dry chemical or CO₂

Unsuitable Media
Water jet may cause fire to spread

Firefighting Procedures: Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

Unusual Hazards
See section 10 for additional information
6. Accidental Release Measures

**Personal precautions, protective equipment, and emergency procedures:** Keep unnecessary personnel away. Wear appropriate personal protective equipment for emergency. Ventilate if released in a confined area. Eliminate sources of ignition if it is safe to do so. Wear suitable personal protective equipment and stop the spread of material will adsorbent or socks if safe to do so.

**Environmental precautions:** Avoid release to the environment. Prevent from entering into soil, ditches, sewers, waterways or groundwater. Produces oil sheen on waterways. Toxic to aquatic organisms

**Methods for removal:** Use a pump or bucket to recover free liquid. Residual liquid can be absorbed on inert material. Use non-sparking tools.

7. Handling and Storage

**Max. Handling Temp:** 70°C / 158°F

**Procedures:** Open container in a cool, well ventilated area. Avoid breathing vapors. Keep containers closed when not in use. Use appropriate containment to avoid environmental contamination. Avoid use in confined areas without adequate ventilation. Areas of inadequate ventilation could contain concentrations high enough to cause eye irritation, headaches, respiratory discomfort or nausea. Avoid breathing dust, fume, gas, mist, vapors, or spray. Wash thoroughly after handling. Launder contaminated clothing before reuse. Empty container contains product residue which may exhibit hazards of the product. Dispose of packaging or containers in accordance with local, regional, national, and international regulations. Store away from strong oxidizers

**Max Store Temp:** 40°C / 104°F
8. Exposure Controls/Personal Protection

Exposure Limits
Guidelines by component
Mineral Oil (mists)
  OSHA TWA:  5 mg/m³
  ACGIH TWA:  5 mg/m³
  TWA (Canada) 5 mg/m³
  STEL (Canada) 10 mg/m³
  EH40-MEL 5 mg/m³, 8 hours
  NOHSC 5 mg/m³, 8 hours

Other Exposure Limits: None known

Engineering Controls: Use in a well ventilated area. Where possible, cover sources of oil sprays and mists with adsorbent cloth to minimize exposure to mineral oil mists. Keep concentrations of mist below exposure limits

Personal Protective Equipment
Respiratory: Where mineral oil mists are generated – use full face respirator with organic vapor cartridge.

Eye: Wear safety glasses where splashing or splattering may occur

Gloves: Use nitrile or neoprene gloves. If material is hot, use appropriately insulated gloves.

Clothing: Use neoprene or nitrile gloves. When handling at elevated temperatures, use insulated apron or coat. Launder contaminated clothing before reuse

Hygiene: Wash thoroughly after handling this product.

9. Physical and Chemical Properties

</tbody>
</table>
Flash Point  
>180°C / 356°F (estimated based on components)

Evaporation Rate  
Nil (where nBuAc = 1)

Upper Flammable Lm  
Not determined

Lower Flammable Lm  
Not determined

Explosive Data  
Not determined

Vapor Pressure  
Not determined

Vapor Density  
Not determined

Volatile Organics  
Not determined

Density  
0.9 mg/cu. cm @ 15.6°C

Solubility  
Insoluble in water, alcohols; soluble in organics

K_{ow}  
Not determined

Viscosity  
Varies based on SAE viscosity grade

Autoignition Point  
Not determined

Decomposition Temp  
Not determined

10. Stability and Reactivity

Stability  
Material is normally stable at normal temperatures and pressures

Decomposition Temp  
Not determined

Incompatibility  
Oxidizers and reducers

Polymerization  
Will not occur

Thermal Decomposition  
Smoke, oxides of carbon, nitrogen, phosphorous, boron, sulfur, and metals. May also generate hydrogen sulfide if stored for extended periods of time at elevated temperatures

Conditions to Avoid  
Keep away from heat, flames, strong oxidizers and strong reducing agents

11. Toxicological Information

- Acute Exposure -

Eye Irritation  
Contact with the eye will likely cause serious irritation. Symptoms include pain, tearing, reddening, swelling, and impaired vision. If material is hot, thermal burns may occur with eye contact

Skin Irritation  
Repeated or prolonged exposure causes skin irritation or non-allergic dermatitis. Symptoms may include redness, drying, and cracking of the skin. Heated material may cause thermal burns

Respiratory Irritation  
May cause nose, throat and lung irritation with mists at elevated temperatures.

Dermal Toxicity  
Not expected to present a danger of dermal toxicity.

Inhalation Toxicity  
Inhalation of this product is not expected to be toxic. Exposure to mineral oil mists may be harmful. Symptoms of over-exposure to mineral oil mists may be similar to that of pneumonia.
Oral Toxicity
Not expected to be harmful. LD50 in rats exceeds 5g/Kg.

Aspiration Hazard
This product does not present a classifiable hazard of aspiration due to viscosity – however, this product may be fatal if swallowed and enters airways, particularly in those with weakened respiratory systems.

- Chronic Exposure -

Chronic Toxicity
No data available to indicate product or components present at greater than 0.2% are chronic health hazards

Carcinogenicity
This product contains mineral oils which are considered to be severely refined and not considered to be carcinogenic under IARC. All of the oils in this product have been demonstrated to contain less than 3% extractables by the IP 346 test.

Mutagenicity
No data available to indicate product or any components at greater than 0.1% are mutagenic or genotoxic.

Reproductive Toxicity
Contains material that may cause adverse reproductive effects with repeated oral exposure based on animal data of components.

Teratogenicity
No data available to indicate product or any components at greater than 0.1% may cause teratogenic effects.

12. Ecological Information

- Environmental Toxicity -

Miscellaneous
No LD/LC/EC50 data was collected for this product. Some components of this product are considered toxicants to aquatic life, though at concentration that is not sufficient to require classification as a marine pollutant or aquatic toxicant.

- Environmental Fate -

Biodegradation
The petroleum oil in this product is not readily biodegradable, but can be broken down by microorganisms and is therefore considered to be inherently biodegradable. Some components of this product may persist in the environment.

Bioaccumulation
The petroleum oil in this product has a K_{ow} greater than 5.3 and is regarded as having the potential to bioaccumulate. In practice, metabolic processes may reduce this potential.

Soil Mobility
This product is expected to have low soil mobility due to very low water solubility and low vapor pressure. Petroleum oils adsorb to soil and sediment. Once adsorbed, the product is expected to adhere to soil until it is slowly biodegraded.

Other Effects
Product will produce oil sheen and float on the surface of bodies of water. The product will spread across the surface as a function of viscosity and velocities of water and surface wind.
13. Disposal Considerations

Disposal Considerations
All disposal practices must be in accordance with local, regional, national, and international regulations. Do not dispose in a landfill. Wherever possible, recycle product to used oil collection facilities in accordance with applicable regulations.

Contaminated Containers or Packaging
Dispose of packaging or containers in accordance with local, regional, national, and international regulations.

14. Transportation Information

Description shown may not apply to all shipping situations. Consult applicable shipping codes to determine any additional shipping requirements.

US DOT
Not Regulated
*If shipped by land in a packaging having a capacity of 3,500 gallons or more, the provisions of 49 CFR, Part 130 apply. (Contains oil)

UN No
Not applicable
UN Proper Name
Not applicable
UN Class
Not applicable
Packing Group
Not applicable
Marine Pollutant
*No
*Product contains petroleum oil which may be classified as a marine pollutant under MARPOL Annex I under certain shipping conditions (Contains oil)

IMDG
Not Regulated
*U.S. DOT compliance requirements may apply. See 49 CFR 171.22, 23 & 25. If transported in bulk by marine vessel in international waters, product is being carried under the scope of MARPOL Annex I.

ICAO/IATA
Not Regulated
*U.S. DOT compliance requirements may apply. See 49 CFR 171.22, 23, & 24.

15. Regulatory Information

- Global Chemical Inventories -

USA
All components of this material are on the US TSCA or are exempt

Other TSCA Reg.
None known

EU
At least one component is not listed in EINECS but all such components are listed in ELINCS. Contact supplier for information on the inventory status of material.

New Zealand
All components are listed or exempted
Canada  
All components are in compliance with the Canadian Environmental Protection Act and are present on the Domestic Substances List.

- Other U.S. Federal Regulations -

SARA Ext. Haz. Subst. This product does not contain greater than 1.0% of any chemical on the SARA Extremely Hazardous Substances list.

SARA Sect. 311/312
- Acute Hazard: YES
- Chronic Hazard: YES
- Fire Hazard: NO
- Reactivity Hazard: NO

SARA 313
Zink dialkyldithiosphosphate; Lead

- State Regulations -

CA Prop 65
WARNING! This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm: Arsenic, Lead, Cadmium.
