1. Product Identification

Champion Brands, LLC
1001 Golden Drive
Clinton, MO 64093
(660) 885-8151

Product line: CHAMPION ® 2 Cycle Power Equipment Oil
Products: 4115, 4683, 4090
CAS: Not applicable (Mixture)
Synonyms: 2 Cycle Engine Oil
Recommended use: Gasoline Engines (JASO FD)
Restrictions: None determined
Created: 6 July 2012
Revised: 25 November 2019
Emergency phone: CHEMTREC: (+1) 800-424-9300

2. Hazards Identification

Appearance: Green Liquid
Odor: Mild Petroleum
Classification: None
Target organs: Not Determined
Symbol(s): 
Signal Word: 
Hazard Statement(s): This product is combustible but difficult to ignite. This product produces oil sheen on bodies of water. Mists of sprays of this product may be harmful if inhaled. Product contains components which are harmful to environment, but at concentrations below GHS classification criteria.
Other hazard(s): 
Precaution(s): Avoid breathing vapors/mist/spray. Wear protective gloves/protective clothing/eye protection. Contaminated work clothing should not be allowed out of the workplace. If skin irritation occurs: Get medical advice. Avoid release to the environment.
Disposal: Keep out of waterways. Check local, national, and international regulations for proper disposal.
3. Composition/Information on Ingredients

Hazardous Ingredients:

<table>
<thead>
<tr>
<th>Component</th>

<td>64742-54-7</td>
<td>2.4 – 4.5</td>
</tr>
<tr>
<td>Amines, polyethylenepoly-, reaction products with succinic anhydride polyisobutanyl derivatives; trade secret</td>
<td>84605-20-9</td>
<td>1 – 2</td>
</tr>
</tbody>
</table>

4. First Aid Measures

Eyes
Flush eyes with running water for at least 15 minutes. If irritation persists, seek medical advice

Skin
Flush exposed area with running water for at least 15 minutes. Remove contaminated clothing and launder before reuse. If irritation persists or if signs of allergic reaction occur, seek medical advice

Inhalation
Move to fresh air. If nausea or other symptoms persist, get medical attention. If not breathing, give artificial respiration. If breathing is difficult, give oxygen and get medical attention immediately.

Ingestion
DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, lower head below hips to reduce risk of aspiration. If conscious, give one glass of water. Get immediate medical attention

Additional Info
Note to physician: Treat symptomatically. Contact poison control for more information.

5. Fire Fighting Measures

Flash Point
99°C / 210°F (ASTM D92)

NFPA
Health: 1 Fire: 1 Reactivity: 0

Extinguishing Media
Use water spray, fog, foam, dry chemical or CO₂

Unsuitable Media
Water jet may cause fire to spread
Firefighting Procedures: Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear

Unusual Hazards See section 10 for additional information

Personal precautions, protective equipment, and emergency procedures: Keep unnecessary personnel away. Wear appropriate personal protective equipment for emergency. Ventilate if released in a confined area. Eliminate sources of ignition if it is safe to do so. Wear suitable personal protective equipment and stop the spread of material will adsorbent or socks if safe to do so.

Environmental precautions: Avoid release to the environment. Prevent from entering into soil, ditches, sewers, waterways or groundwater. Produces oil sheen on waterways. Toxic to aquatic organisms

Methods for removal: Use a pump or bucket to recover free liquid. Residual liquid can be absorbed on inert material. Use non-sparking tools.

6. Handling and Storage

Max. Handling Temp: 35°C / 95°F

Procedures: Open container in a cool, well ventilated area. Avoid breathing vapors. Keep containers closed when not in use. Use appropriate containment to avoid environmental contamination. Avoid use in confined areas without adequate ventilation. Areas of inadequate ventilation could contain concentrations high enough to cause eye irritation, headaches, respiratory discomfort or nausea. Avoid breathing dust, fume, gas, mist, vapors, or spray. Wash thoroughly after handling. Launder contaminated clothing before reuse. Empty container contains product residue which may exhibit hazards of the product. Dispose of packaging or containers in accordance with local, regional, national, and international regulations. Store away from strong oxidizers

Max Store Temp: 35°C / 95°F

7. Exposure Controls/Personal Protection

Exposure Limits

Guidelines by component

Mineral Oil (mists)

OSHA TWA: 5 mg/m3
ACGIH TWA: 5 mg/m³
TWA (Canada) 5 mg/m³
STEL (Canada) 10 mg/m³
EH40-MEL 5 mg/m³, 8 hours
NOHSC 5 mg/m³, 8 hours

Distillates (Petroleum), Hydrotreated Light (vapor)
RCP TWA: 1200 mg/m³ (165 ppm)

Other Exposure Limits: None known

Engineering Controls: Use in a well ventilated area. Where possible, cover sources of oil sprays and mists with adsorbent cloth to minimize exposure to mineral oil mists. Keep concentrations of mist below exposure limits

Personal Protective Equipment
Respiratory: Where mineral oil mists are generated – use full face respirator with organic vapor cartridge.

Eye: Wear safety glasses where splashing or splattering may occur

Gloves: Use nitrile or neoprene gloves. If material is hot, use appropriately insulated gloves.

Clothing: Use neoprene or nitrile gloves. When handling at elevated temperatures, use insulated apron or coat. Launder contaminated clothing before reuse

Hygiene: Wash thoroughly after handling this product.

Revised: 11/25/2019
Vapor Pressure  Not determined
Vapor Density  Not determined
Volatile Organics  Not determined
Density  0.9 mg/cu. cm @15.6°C
Solubility  Insoluble in water, alcohols; soluble in organics
K_{ow}  Not determined
Viscosity  84 cSt @ 40°C
Autoignition Point  Not determined
Decomposition Temp  Not determined

9. Stability and Reactivity

Stability  Material is normally stable at normal temperatures and pressures
Decomposition Temp  Not determined
Incompatibility  Oxidizers and reducers
Polymerization  Will not occur
Thermal Decomposition  Smoke, oxides of carbon, nitrogen, phosphorous, boron, sulfur, and metals. May also generate hydrogen sulfide if stored for extended periods of time at elevated temperatures
Conditions to Avoid  Keep away from heat, flames, strong oxidizers and strong reducing agents

10. Toxicological Information

- Acute Exposure –

Eye Irritation  Contact with the eye may cause irritation. Symptoms include pain, tearing, reddening, swelling, and impaired vision. If material is hot, thermal burns may occur with eye contact
Skin Irritation  Repeated or prolonged exposure cause skin irritation or allergic dermatitis based on data from components. Symptoms may include redness, drying, and cracking of the skin. Heated material may cause thermal burns
Respiratory Irritation  May cause nose, throat and lung irritation based on data from components. These effects may be more prevalent with mists at elevated temperatures.
Dermal Toxicity  Not expected to present a danger of dermal toxicity.
Inhalation Toxicity  Inhalation of this product is not expected to be toxic. Exposure to mineral oil mists may be harmful. Symptoms of over-exposure to mineral oil mists may be similar to that of pneumonia.
Oral Toxicity  Not expected to be harmful. LD50 in rats exceeds 5g/Kg.
Aspiration Hazard  This product does not present a classifiable hazard of aspiration due to viscosity – however, this product may be fatal if swallowed and enters airways, particularly in those with weakened respiratory systems.
- Chronic Exposure –

**Chronic Toxicity**  No data available to indicate product or components present at greater than 0.2% are chronic health hazards

**Carcinogenicity**  This product contains mineral oils which are considered to be severely refined and not considered to be carcinogenic under IARC. All of the oils in this product have been demonstrated to contain less than 3% extractables by the IP 346 test.

**Mutagenicity**  No data available to indicate product or any components at greater than 0.1% are mutagenic or genotoxic.

**Reproductive Toxicity**  Contains material that may cause adverse reproductive effects with repeated oral exposure based on animal data of components.

**Teratogenicity**  No data available to indicate product or any components at greater than 0.1% may cause teratogenic effects.

11. Ecological Information

- Environmental Toxicity –

**Miscellaneous**  No LD/LC/EC50 data was collected for this product. Some components of this product are considered chronic toxicants to aquatic life, though at concentration that is not sufficient to require classification as a marine pollutant or aquatic toxicant.

- Environmental Fate –

**Biodegradation**  The petroleum oil in this product is not readily biodegradable, but can be broken down by microorganisms and is therefore considered to be inherently biodegradable. Some components of this product may persist in the environment.

**Bioaccumulation**  The petroleum oil in this product has a $K_{ow}$ greater than 5.3 and is regarded as having the potential to bioaccumulate. In practice, metabolic processes may reduce this potential.

**Soil Mobility**  This product is expected to have low soil mobility due to very low water solubility and low vapor pressure. Petroleum oils adsorb to soil and sediment. Once adsorbed, the product is expected to adhere to soil until it is slowly biodegraded.

**Other Effects**  Product will produce oil sheen and float on the surface of bodies of water. The product will spread across the surface as a function of viscosity and velocities of water and surface wind.

12. Disposal Considerations

**Disposal Considerations**  All disposal practices must be in accordance with local, regional, national, and international regulations. Do not dispose in a landfill. Wherever possible, recycle product to used oil collection facilities in accordance with applicable regulations.
Contaminated Containers or Packaging
Dispose of packaging or containers in accordance with local, regional, national, and international regulations

13. Transportation Information
Description shown may not apply to all shipping situations. Consult applicable shipping codes to determine any additional shipping requirements

US DOT
Not Regulated
*If shipped by land in a packaging having a capacity of 3,500 gallons or more, the provisions of 49 CFR, Part 130 apply. (Contains oil)

UN No
Not applicable
UN Proper Name
Not applicable
UN Class
Not applicable
Packing Group
Not applicable
Marine Pollutant
*Yes
*Product contains petroleum oil which may be classified as a marine pollutant under MARPOL Annex I under certain shipping conditions

IMDG
Not Regulated
*U.S. DOT compliance requirements may apply. See 49 CFR 171.22, 23 & 25. If transported in bulk by marine vessel in international waters, product is being carried under the scope of MARPOL Annex I.

ICAO/IATA
Not Regulated
*U.S. DOT compliance requirements may apply. See 49 CFR 171.22, 23, & 24.

14. Regulatory Information

- Global Chemical Inventories –
USA
All components of this material are on the US TSCA or are exempt
Other TSCA Reg.
None known
EU
Components of this product comply with EU 7th Amendment and are approved for EU sales. Records must be maintained and reported to EU only registrants if product is imported to the EU. Third party importers are asked to report every EU import to Champion Brands, LLC.
New Zealand
All components are listed or exempted
Canada
All components are in compliance with the Canadian Environmental Protection Act and are present on the Domestic Substances List

- Other U.S. Federal Regulations –
SARA Ext. Haz. Subst. This product does not contain greater than 1.0% of any chemical on the SARA Extremely Hazardous Substances list.

SARA Sect. 311/312
