1. Product Identification

Champion Brands, LLC
1001 Golden Drive
Clinton, MO 64093
(660) 885-8151

Product line: CHAMPION® SynGold® Euro Engine Oils
Products: 4434, 4427
CAS: Not applicable (Mixture)
Synonyms: Passenger Car Motor Oil
Recommended use: Engine Crankcase Oil
Restrictions: Nonedetermined
Created: 17 October 2013
Revised: 27 November 2019
Emergency phone: CHEMTREC(+1)800-424-9300

2. Hazards Identification

Appearance: Amber liquid
Odor: Mild Petroleum
Classification: Skin corrosion / irritation, Category 2
Target organs: Not Determined

Symbol(s):
Signal Word: Warning
Hazard Statement(s): Causes skin irritation
Other hazard(s): Product will burn, though difficult to ignite. This product produces oil sheen on bodies of water. Mists of sprays of this product may be harmful if inhaled. Product contains components which are harmful to environment and may cause skin or eye irritation, but at concentrations below GHS classification criteria. Used crankcase oil may contain carcinogenic combustion by-products.

Precaution(s): Avoid breathing vapors/mist/spray. Wear protective gloves/protective clothing/eye protection. Contaminated work clothing should not be allowed out of the workplace. If skin
irritation occurs: Get medical advice. Avoid release to the environment.

Disposal:
Keep out of waterways. Check local, national, and international regulations for proper disposal.

### 3. Composition/Information on Ingredients

**Hazardous Ingredients:**

<table>
<thead>
<tr>
<th>Component</th>
<th>CAS No.</th>

</tbody>
</table>

### 4. First Aid Measures

**Eyes**
Flush eyes with running water for at least 15 minutes. Get medical attention if irritation persists.

**Skin**
Flush exposed area with running water for at least 15 minutes. Remove contaminated clothing and launder before reuse. Get medical attention if irritation persists or if signs of an allergic reaction appear.

**Inhalation**
Move to fresh air. If nausea or other symptoms persist, get medical attention. If not breathing, give artificial respiration. If breathing is difficult, give oxygen and get medical attention immediately.

**Ingestion**
DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, lower head below hips to reduce risk of aspiration. If conscious, give one glass of water. Get immediate medical attention.

**Additional Info**
Note to physician: Treat symptomatically. Contact poison control for more information.

### 5. Fire Fighting Measures

**Flash Point**
> 180°C / 356°F (based on flammability of components)

**NFPA**
Health: 1  Fire: 1  Reactivity: 0

**Extinguishing Media**
Use water spray, fog, foam, dry chemical or CO₂
Unsuitable Media: Water jet may cause fire to spread

Firefighting Procedures: Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear

Unusual Hazards: See section 10 for additional information

6. Accidental Release Measures

Personal precautions, protective equipment, and emergency procedures: Keep unnecessary personnel away. Wear appropriate personal protective equipment for emergency. Ventilate if released in a confined area. Eliminate sources of ignition if it is safe to do so. Wear suitable personal protective equipment and stop the spread of material will adsorbent or socks if safe to do so.

Environmental precautions: Avoid release to the environment. Prevent from entering into soil, ditches, sewers, waterways or groundwater. Produces oil sheen on waterways. Toxic to aquatic organisms

Methods for removal: Use a pump or bucket to recover free liquid. Residual liquid can be absorbed on inert material. Use non-sparking tools.

7. Handling and Storage

Max. Handling Temp: 70°C / 158°F
Procedures: Open container in a cool, well ventilated area. Avoid breathing vapors. Keep containers closed when not in use. Use appropriate containment to avoid environmental contamination. Avoid use in confined areas without adequate ventilation. Areas of inadequate ventilation could contain concentrations high enough to cause eye irritation, headaches, respiratory discomfort or nausea. Avoid breathing dust, fume, gas, mist, vapors, or spray. Wash thoroughly after handling. Launder contaminated clothing before reuse. Empty container contains product residue which may exhibit hazards of the product. Dispose of packaging or containers in accordance with local, regional, national, and international regulations. Store away from strong oxidizers

Max Store Temp: 40°C / 104°F
8. Exposure Controls/Personal Protection

Exposure Limits
Guidelines by component
Mineral Oil (mists)
  OSHA TWA: 5 mg/m3
  ACGIH TWA: 5 mg/m3
  TWA (Canada) 5 mg/m3
  STEL (Canada) 10 mg/m3
  EH40-MEL 5 mg/m3, 8 hours
  NOHSC 5 mg/m3, 8 hours

  Diphenylamine:
    ACGIH TWA: 10mg/m3

Other Exposure Limits: None known

Engineering Controls: Use in a well ventilated area. Where possible, cover sources of oil sprays and mists with adsorbent cloth to minimize exposure to mineral oil mists. Keep concentrations of mist below exposure limits

Personal Protective Equipment
Respiratory: Where mineral oil mists are generated – use full face respirator with organic vapor cartridge.

Eye: Wear safety glasses where splashing or splattering may occur

Gloves: Use nitrile or neoprene gloves. If material is hot, use appropriately insulated gloves.

Clothing: Use neoprene or nitrile gloves. When handling at elevated temperatures, use insulated apron or coat. Launder contaminated clothing before reuse

Hygiene: Wash thoroughly after handling this product.

9. Physical and Chemical Properties

  Appearance: Amber liquid
  Odor: Mild Petroleum
  Odor threshold: Not determined
  pH: Not determined
Melting Point | Not determined
Initial Boiling Pt/Rng | Not determined
Flash Point | > 180°C / 356°F (estimated based on components)
Evaporation Rate | Nil (where nBuAc = 1)
Upper Flammable Lm | Not determined
Lower Flammable Lm | Not determined
Explosive Data | Not determined
Vapor Pressure | Not determined
Vapor Density | Not determined
Volatile Organics | Not determined
Density | 0.9 mg/cu. cm @15.6°C
Solubility | Insoluble in water, alcohols; soluble in organics
K<sub>ow</sub> | Not determined
Viscosity | Varies based on SAE viscosity grade
Autoignition Point | Not determined
Decomposition Temp | Not determined

### 10. Stability and Reactivity

**Stability** | Material is normally stable at normal temperatures and pressures
**Decomposition Temp** | Not determined
**Incompatibility** | Oxidizers and reducers
**Polymerization** | Will not occur
**Thermal Decomposition** | Smoke, oxides of carbon, nitrogen, phosphorous, boron, sulfur, and metals. May also generate hydrogen sulfide if stored for extended periods of time at elevated temperatures
**Conditions to Avoid** | Keep away from heat, flames, strong oxidizers and strong reducing agents

### 11. Toxicological Information

**- Acute Exposure -**

**Eye Irritation** | May cause eye irritation. Does not meet Canadian D2B or EU R36. Based on data from components or similar materials.

**Skin Irritation** | Skin irritant. Based on data from components or similar materials. Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying and cracking of the skin.

**Respiratory Irritation** | If material is misted or if vapors are generated from heating, exposure may cause irritation of the mucous membranes and the upper respiratory tract. Based on data from components or similar materials.

**Dermal Toxicity** | Not expected to present a danger of dermal toxicity under normal conditions of use.
Inhalation Toxicity
Inhalation of this product is not expected to be toxic. Exposure to mineral oil mists may be harmful. Symptoms of over-exposure to mineral oil mists may be similar to that of pneumonia.

Oral Toxicity
Not expected to be harmful. LD50 in rats exceeds 5g/Kg.

Aspiration Hazard
This product does not present a classifiable hazard of aspiration due to viscosity – however, this product may be fatal if swallowed and enters airways, particularly in those with weakened respiratory systems.

- Chronic Exposure -

Chronic Toxicity
Repeated-dose oral toxicity studies in rats using a component contained in this product revealed internal organ effects (i.e., liver and thyroid enlargement). These effects were considered adaptive and were reversible upon cessation of treatment.

Carcinogenicity
This product contains mineral oils which are considered to be severely refined and not considered to be carcinogenic under IARC. All of the oils in this product have been demonstrated to contain less than 3% extractables by the IP 346 test.

Mutagenicity
No data available to indicate product or any components at greater than 0.1% are mutagenic or genotoxic.

Reproductive Toxicity
This product contains para-dodecylphenol. Rats given high, repeated daily doses of para-dodecylphenol by oral intubation experienced adverse reproductive effects. The relevance of these effects to humans is uncertain.

Teratogenicity
This product contains para-dodecylphenol. Pregnant rats given high, repeated daily doses of para-dodecylphenol by oral intubation gave birth to pups with cleft palate and skeletal malformations. The relevance of these effects to humans is uncertain. There are conflicting reports in the literature concerning the teratogenicity of diphenylamine. However, because the predominant route of exposure was oral (via gavage or diet) and relatively high dose levels were administered in the studies where positive effects were observed, it would not seem to present a workplace hazard.

12. Ecological Information

- Environmental Toxicity -

Miscellaneous
No LD/LC/EC50 data was collected for this product. Some components of this product are considered chronic toxicants to aquatic life, though at concentration that is not sufficient to require classification as a marine pollutant or aquatic toxicant.
- Environmental Fate -

Biodegradation
The petroleum oil in this product is not readily biodegradable, but can be broken down by microorganisms and is therefore considered to be inherently biodegradable. Some components of this product may persist in the environment.

Bioaccumulation
The petroleum oil in this product has a $K_{ow}$ greater than 5.3 and is regarded as having the potential to bioaccumulate. In practice, metabolic processes may reduce this potential.

Soil Mobility
This product is expected to have low soil mobility due to very low water solubility and low vapor pressure. Petroleum oils adsorb to soil and sediment. Once adsorbed, the product is expected to adhere to soil until it is slowly biodegraded.

Other Effects
Product will produce oil sheen and float on the surface of bodies of water. The product will spread across the surface as a function of viscosity and velocities of water and surface wind.

13. Disposal Considerations

Disposal Considerations
All disposal practices must be in accordance with local, regional, national, and international regulations. Do not dispose in a landfill. Wherever possible, recycle product to used oil collection facilities in accordance with applicable regulations.

Contaminated Containers or Packaging
Dispose of packaging or containers in accordance with local, regional, national, and international regulations.

14. Transportation Information

Description shown may not apply to all shipping situations. Consult applicable shipping codes to determine any additional shipping requirements.

US DOT
Not Regulated

*If shipped by land in a packaging having a capacity of 3,500 gallons or more, the provisions of 49 CFR, Part 130 apply. (Contains oil)

UN No
Not applicable

UN Proper Name
Not applicable

UN Class
Not applicable

Packing Group
Not applicable

Marine Pollutant
*Yes

*Product contains petroleum oil which may be classified as a marine pollutant under MARPOL Annex I under certain shipping conditions.

IMDG
Not Regulated
15. Regulatory Information

- Global Chemical Inventories -

**USA**
All components of this material are on the US TSCA or are exempt

**Other TSCA Reg.**
None known

**EU**
Components of this product comply with EU 7th Amendment and are approved for EU sales. Records must be maintained and reported to EU only registrants if product is imported to the EU. Third party importers are asked to report every EU import to Champion Brands, LLC.

**New Zealand**
All components are listed or exempted

**Canada**
All components are in compliance with the Canadian Environmental Protection Act and are present on the Domestic Substances List

- Other U.S. Federal Regulations -

**SARA Ext. Haz. Subst.**
This product does not contain greater than 1.0% of any chemical on the SARA Extremely Hazardous Substances list.

**SARA Sect. 311/312**
Acute Hazard - NO
Chronic Hazard - YES
Fire Hazard - NO
Reactivity Hazard - NO

**CERCLA**
From 0.5 – 2% zinc compounds; contains 0.2% as Zn.

**EPCRA**
Zink dialkyldithiosphosphate (CAS # 84605-29-8)

- State Regulations -

**CA Prop 65**
This product contains the following chemicals known to the State of California to cause cancer and/or birth defects based on maximum impurity levels of components: <0.001 ppm Ethyl benzene (CAS# 100-41-4); <0.001 ppm Naphthalene (CAS$ 91-20-3) <0.005 ppm Cadmium; <0.01 ppm arsenic; <0.01 ppm lead
Right to Know Component | Right to Know States
--- | ---
Zinc dialkyldithiosphosphate (CAS # 84605-29-8) | NJ
Diphenylamine (CAS # 122-39-4) | NJ, PA, MA

16. Other Information

Revision updates may be in many sections and the MSDS should be read in its entirety.
Prepared according to the UN Globally Harmonized System for the Classification and Labeling of Chemicals (GHS) by Champion LLC, 1001 Golden Drive, Clinton, Missouri 64735.
