

CHAMPION PDS

PRODUCT DATA SHEET

FORM RELEASE OIL

CHAMPION Form Release Oil is a mineral based concrete form release agent made from purified petroleum stocks and proprietary chemistry including specific selections of fatty acids in combination with antioxidants.

Specialized chemistry is designed and recommended for universal use on wood, metal and prefabricated concrete molds. In addition to great form release properties, it also provides an excellent barrier of protection on all metal forms preventing rust formation.

Universal release agent for different concrete forms

Non-staining

Penetrates and coats surfaces and crevices

Protects metal forms from rust formation

Works well in both spray and roll-on applications

Equal performance and protection in both hot and cold environments

PART# 4103

TYPICAL PROPERTIES:

PRODUCT CODE:	4103
GRAVITY API @ 60°F	34.4
ACID NUMBER mg/ml KOH	= 5.5
VISCOSITY @ 40°C, cSt	14.0
POUR POINT °F	-50
FLASH POINT °F	392

Available in:

4103AN - 55 Gallon
