Champion HTS Gear Lubes are premium, fully synthetic extreme pressure automotive gear lubricants designed to meet the challenges of modern light-duty and heavy-duty axle differentials. Longer service intervals, more power transfer density, smaller oil volumes and limited air cooling place exceptional demands on today’s axles. Only an exceptional lubricant should be trusted to protect your equipment.

Extreme pressure additive technology is field-tested and exceeds API GL-5
Lower coefficients of friction than conventional oils delivering better fuel economy
Permanent shear stability provides protection to gears even during long drain intervals
Low temperature performance protects gears during critical cold starts
Synthetic base oils provide excellent thermal and oxidative stability
Delivers Champion limited slip additive – providing excellent limited slip performance that lasts

Use with confidence in open differentials, limited slip differentials and other locking differentials where an API GL-5 or API GL-4 lubricant is specified

PART# 4314 - 75W-90
PART# 4315 - 80W-140
PART# 4317 - 75W-140
